GREEN TEAM SURVEY 11

GREEN TEAM WEBSITE

OVERVIEW

The purpose of this document guide is to provide you with the “golden” copy of what each webpage should look like. Teams should utilize this document as a guide to help ensure that their websites look like the golden copy. Green team users will be provided with a similar document that helps them complete your website evaluation. It is in your best interest to read through this whole document and the green team survey as this should answer most of your questions.

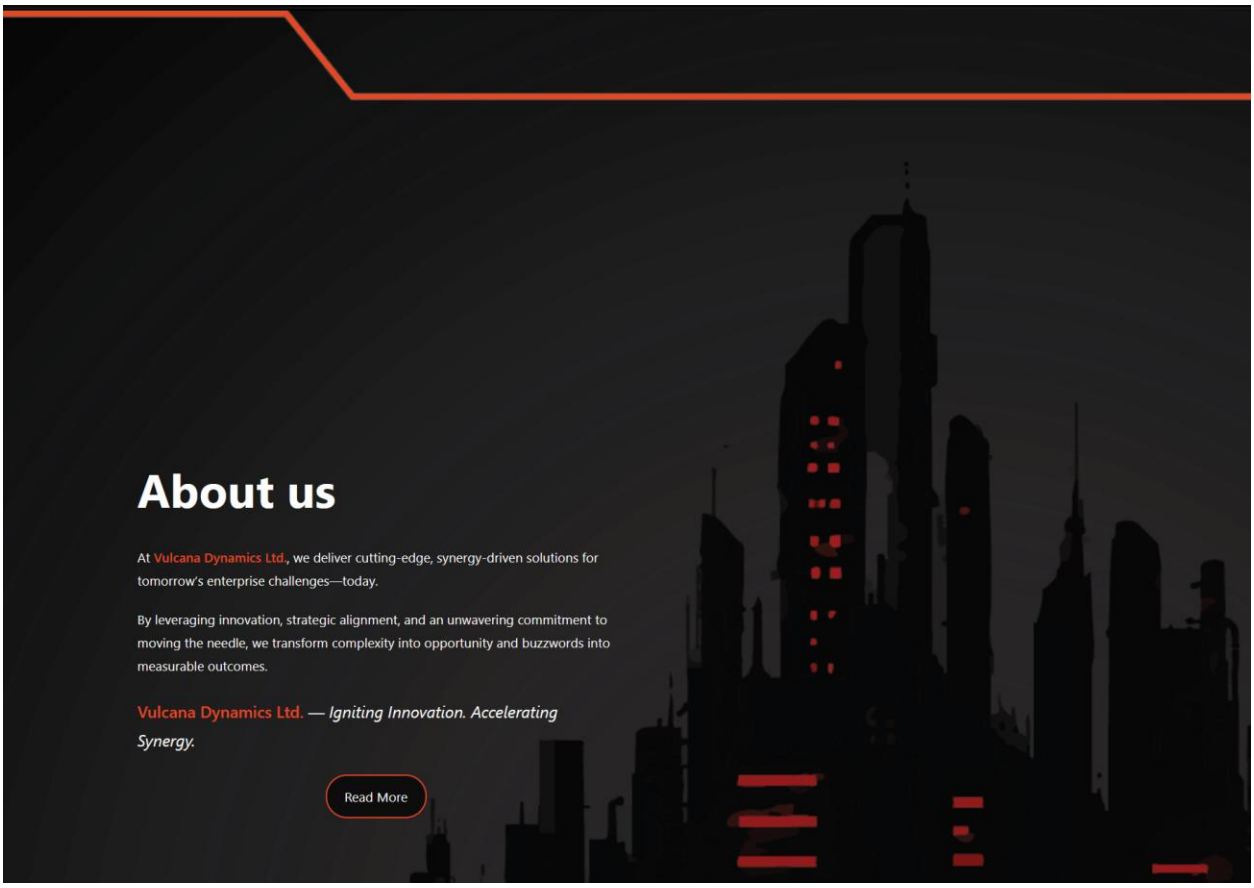

For accessing your website, you will need to be RDP'd into a machine on your subnet and use the DNS name task.blue0000.cfc.local where blue0000 is your team number. For example, Team 122 is task.blue0122.cfc.local. Utilizing the local IP **will not** work for this website and you will need to handle access utilizing this DNS to ensure that the Green team can access the site for testing. Please note that this DNS is handled by us on AWS and there is nothing extra you need to do as a blue team to get this to work.

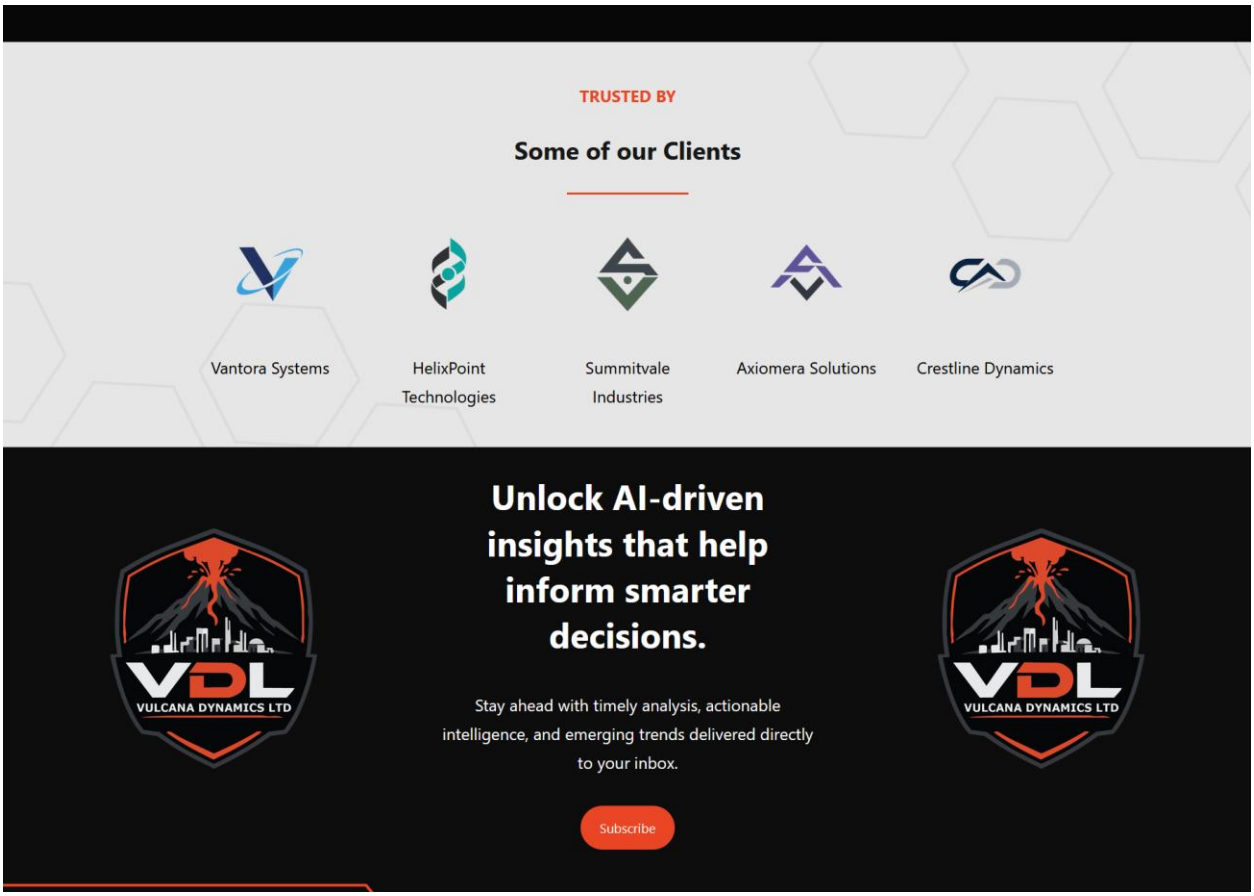

When creating website users, you **MUST USE THE DOMAIN:** *“vulcana-dynamics.ltd"* to associate them with their usernames.

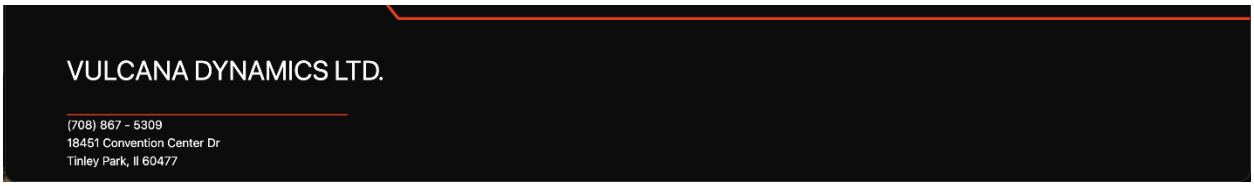

Note: The Green Team Survey is subjective in nature. Not all the evaluators are in the room. This is why we have provided you with the golden copy image and are providing our graders with the same. Please be sure to utilize the same Wordpress library for your images and not reupload. This will avoid issues later.

About Us
At Vulcana Dynamics Ltd., we are proud to be a globally synergistic leader in next-generation strategic technological enablement solutions for tomorrow's enterprise landscape.
What does that mean? We're still aligning on the terminology.
Founded with a commitment to innovation, disruption, and aggressively nodding during stakeholder meetings, Vulcana Dynamics Ltd. exists to deliver scalable, agile, cloud-adjacent solutions that drive transformational value across vertically integrated ecosystems.
Our core competencies include:
Leveraging synergy
Optimizing paradigms
Accelerating digital transformation
Circle-backing offline
Moving the needle
Boiling the ocean
Creating actionable action items
Our proprietary Dynamic Vulcanization Framework™ (DVF) empowers organizations to harness data-driven insights while maximizing operational throughput and minimizing unnecessary accountability.
At Vulcana Dynamics Ltd., we believe every challenge is an opportunity—preferably one that can be converted into a quarterly initiative with a 94-slide deck and at least three steering committees.
Security is at the heart of everything we do. Our cyber resilience methodologies utilize military-grade, enterprise-ready, AI-enabled, blockchain-compatible best practices to proactively mitigate emerging threat vectors before they can negatively impact key deliverables or quarterly OKRs.
Our people are our greatest asset. That's why we foster a collaborative culture built on innovation, excellence, and carefully scheduled recurring meetings that could have been emails.

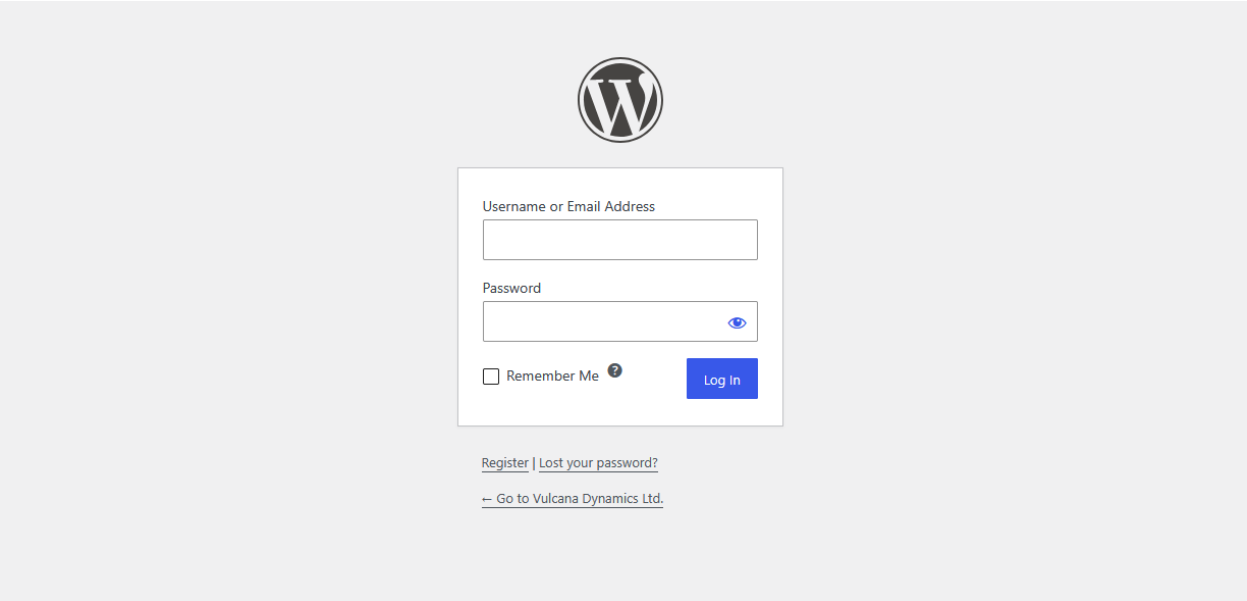

Our Mission
To holistically empower enterprise stakeholders through synergistic digital acceleration while delivering measurable transformational outcomes at scale.
Our Vision
To redefine the future of innovation by pioneering a world where every workflow is optimized, every KPI is green, and every problem can be solved with a dashboard.
Our Values
Innovation — If it has "AI" in the name, we're interested.
Integrity — We always act ethically, unless procurement gets involved.
Excellence — Good enough, but in a premium font.
Collaboration — Nobody understands the project, but we're aligned.

GREEN TEAM SURVEY

1. ENSURE SITE LOADS. I was able to connect to task.blueXXXX.cfc.local. If unable to connect, then please mark false for the remaining questions. See the landing page image (website 1).	**True**	**False**
2. CHECK THE SITE COLOR. All site accent colors should be Orange: #ea4524.	**True**	**False**
3. CHECK THE NAVIGATION BAR ORDER. The top navigation bar should read from left to right: Home | About Us | Subscribe | Login	**True**	**False**
4. CHECK HOME BACKGROUND IMAGE. Just below the navigation bar on the home page, there should be a photo banner named volcano-1.png (found in the WordPress media library) Page depicted in the image (website 1).	**True**	**False**
5. CHECK THE HOME TAGLINE. The tagline in front of the home background image should read, **Transforming ideas into innovation with AI and human expertise.** **Explore conversations from our CEO on emerging technology, strategy, and the future of the industry across leading platforms and even RSS.**	**True**	**False**
6. CHECK THE "ABOUT US" OPTIONS. On the About Us page, there should sections with provided information, such as: Our core competencies include: Dynamic Vulcanization Framework Our Mission Our Vision Our Values	**True**	**False**
7. CHECK IF ADMIN MIDDLEWARE IS WORKING. *When creating website users, you must use the domain: "@vulcana-dynamics.ltd" to associate them with their usernames.* Click **Login**. You should be able to login to the user with the following credentials: *username = green-user* *password = password* While logged in, you should not see the "**Admin**" button, next to "**Logout**". If you are able to login and there is not an Admin button present, mark True. If you cannot log in or the Admin button is there, mark False. **Ensure you log out**.	**True**	**False**
8. CHECK IF ADMIN USERS ARE LISTED. *When creating website users, you must use the domain: "@vulcana-dynamics.ltd" to associate them with their usernames.* Click **Login**. You should be able to login to the user with the following credentials: *username = green-admin* *password = password* You should be able to check the current users registered within the site by clicking on the "Users" button within the Admin dashboard. The users **'blue'** and '**green-admin'** should have the admin tags. If you cannot log in or either user does not have an Admin tag, mark False.	**True**	**False**
9. CHECK FOOTER TEXT. The Footer Text is located on the bottom of every webpage, and it should read: *VULCANA DYNAMICS LTD.* *(708) 867-5309* *18451 Convention Center Dr.* *Tinley Park, IL 60477*	**True**	**False**
10. CHECK THE GEOTHERMAL DATA PAGE. On the Geothermal Data page, the page should provide data charts depicting: **"Total Power Generated"** **"Power Generated"** **"City Draw"** **"Radar Draw"** If you are unable to get to the Geothermal Data Page or there is no data showing, mark False. See image (website 2).	**True**	**False**
11. CHECK THE LOGOS IN THE HEADER. There is a logo for Vulcana Dynamics Ltd. within the site navigation bar. See the image (website 1).	**True**	**False**
12. ENSURE THE CHAT BOT HELPER WORKS There is a chatbot located at the bottom right-hand corner of the page. Ensure that the chatbot opens when clicked on, and when asked about Vulcana with the message "tell me about Vulcana" it responds with information about the company written within the webpage. Response:	**True**	**False**

"Vulcana Dynamics Ltd. is a globally synergistic leader in next-generation strategic technological enablement solutions. Founded with a commitment to innovation, disruption, and moving the needle, we transform complexity into opportunity."
